

Instructions:

1. Start your Metatrader 4 program. On the upper left choose FILE/OPEN DATA FOLDER. This will open the folder where your Metatrader 4 is installed.
2. Continue to MQL4/INDICATORS
3. Copy files Market profile.ex4 and Market profile.mq4 there.

4. You can now open Market Profile by selecting: INSERT/INDICATORS/CUSTOM/MARKET PROFILE in your Metatrader 4 platform.
5. This Market Profile visualization is optimized for M30 charts. It looks like this:
