## TD Lines for NT8 – Installation and authorization

TD lines for NT8 is an indicator that will automatically draw current INTRADAY and SWING trading levels into your NinjaTrader 8 charts.

Installation:

- 1. Run **TDLinesSetup** and install TD lines. It will ask you where you want to install it, but it does not really matter which folder you chose for the installation.
- 2. Once installed restart your NinjaTrader 8 platform.
- 3. Open NT8 platform again, right click your chart and go to Indicators.
- 4. You will now be able to see TD Lines there. Double click it to add it to your active indicators.

- 5. You can adjust whether you want to see Intraday levels, Swing levels or both. You can also adjust some cosmetics.
- 6. TD Lines are automatically updated every 5 minutes or if you reload your chart by pressing F5.
- 7. IMPORTANT: You will need to have your TD lines authorized or they won't show. To authorize Your TD lines you need to send me an email (contact@trader-dale.com) with subject line "TD LINES". In this email you need to send me your Machine ID. It is in NinjaTrader Control Center→ Help → About

PS. Please **copy and paste the Machine ID into the email and don't do a screenshot**. There is too many of you and manualy re-writing everybody's ID in my license management software would take quite a lot of time. Please make it easy for me so I can simply copy+paste your ID into my software.

PSS. If you are sending me your Machine ID from a different email than the email you used for signing up with my service, please let me know so I can match your "official" email with your Machine ID.

I hope you like it! -Dale
